Subject: DTSC Quarterly - needs
Attachments: FW: DTSC Quarterly Meeting - very brief site update needed

DTSC Quarterly on Tuesday, 23Jan. Mohsen wants an hour in the morning to discuss Hunters Point. So 2 things:

- 1) We have been asked to contribute summary updates on the important sites (See my email on 17Jan at 3:58 that included Lily). Still no word from Lily. Shall I call her? She has not been in at all this week (schedule says travel?). I copy below the entry for HP from the last quarterly.
- 2) Looks like Lily put the 23Jan 1030 to 1130 HP meeting on your and Angeles schedule. Do you know if either of you will attend in person or will this be a call in? Caleb is trying to coordinate with Mohsen ...

=====

From Apr2017 DTSC Quarterly Summary

- Hunters Point: The transfers of portions of the Hunters Point Naval Shipyard for redevelopment have been delayed at least a year due to falsification of radiation data by Navy contractor, Tetra Tech EC. The Navy, under EPA oversight, is addressing this concern through data evaluation, new re-sampling, and, if necessary, new cleanup.
